DON'T BE BALD

Here's a Good Way to Stop Loss of Hair and Start New Hair Growth. Hair can never be made to grow again after the roots themselves are dead. But few of us, fortunately, grow bald in many days, and we have a warning that our hair is steadily growing thinner.

Parlan Sage is probably as effective a hair grower as could possibly be found, but to prevent further loss of hair, and to actually start a new hair growth on the bald and thin spots, it must be rubbed right into the scalp with finger tips, or a medium stiff brush, so that the hair roots can really absorb it. Try to get as much on the scalp, and as little on the hair, as possible. Your hair doesn't need it but your scalp does, and a few weeks scalp massage with Parlan Sage (just a few minutes daily) will usually check any further loss of hair and make the hair grow as thickly and luxuriantly as ever.
